

INDIANA'S TELEPHONE PRIVACY LAW has greatly improved the quality of my family's evenings and weekends. We do not want to be bothered by phone calls from banks, phone companies, credit card companies or anyone else trying to obtain our business or to seek contributions for a myriad of agencies or groups. We have never and will never subscribe to an offer received by phone. When we want or need a service or product we will seek it out on our own. We do not make contributions to agencies contacting us by phone. We already have charitable entities that we contribute to. My family's evenings and weekends are very precious. We all work or go to school and that is our time together and we DO NOT want to be bothered by the phone ringing with offers and requests. We requested to be on the "do not call list" and I beseech you that you do not take away our right to privacy and peace and quiet.
